2. Mr. Henry Leo Lee Kuang, 019-8891193

Target participants

Parents, teachers and other interested individuals

Aim of Workshop

The workshop aims to equip participants with the knowledge and understanding of

- what dyslexia is
- signs and symptoms of dyslexia
- causes of dyslexia
- that an academic problem of dyslexia can exacerbate into a borderless social-emotional problem if left unidentified and unsupported
- the importance of early support in an affected child's learning
- types of support services provided for children with dyslexia in examinations and skills to help children at risk for dyslexia to learn to read and spell using a structured, phonics-based and multi-sensorial reading program.

Dyslexia is a learning disability characterized by the difficulty to read & write despite average or above average intelligence and adequate learning experiences. It is due to some variation in the structure and function of the brain, although the exact causes are still not completely clear.
