

ELECTRONIC RESOURCES

EVER WONDERED ABOUT ME?

An electronic resource refers to a database that contains various types of information such as articles, journals, electronic books, newspaper articles, and more. These resources are categorized based on their type, subject, and alphabetical ordering, allowing users to easily search for and access relevant information.

These databases, often called "Electronic Resources," allow people to search library catalog, journal articles, corporate financial data, and a wide variety of other data from an extremely diverse group of information providers, each with unique searching interfaces.

Hi there, I'm an electronic resources (online database) from the Sarawak State Library. Explore my wonder world by scanning me if you're curious!

Not sure how to use me? No worries, just connect with our Reference Librarian.
